SUMMARY

Motivated cybersecurity undergraduate at BINUS University with hands-on experience in web application security, ethical hacking, and network defense. Skilled in Python, SQL, and Linux environments, with practical exposure to vulnerability analysis through Hack The Box challenges and academic projects. Eager to apply technical and analytical abilities in a professional security environment as an intern.

EXPERIENCE

Hack The Box Challenges - Independent Practice   Present
- Completed machines, applying penetration-testing methodologies and documenting findings.
- Practiced enumeration, privilege escalation, and web exploitation techniques in controlled environments.
- Improved understanding of real-world attack surfaces and mitigation strategies.

https://github.com/ervifssnt/HTB-Writeups

Secure Web Programming Project - Academic Work   2025
- Designed and implemented a secure web application using PHP, SQL, HTML, and JavaScript.
- Applied input validation, parameterized queries, and encryption to prevent OWASP Top 10 vulnerabilities.
- Conducted penetration testing on the application to identify and patch flaws prior to final submission.

EDUCATION

Cyber Security   2023 - Present
BINUS University - Bachelor of Science in Cybersecurity

CERTIFICATES

Google Cybersecurity Certificate   Present
Google / Coursera

SKILLS

Platforms & Concepts	Advanced	Risk Evaluation	Advanced
Security Tools	Intermediate	Intrusion Detection Systems (IDS)	Intermediate
Languages & Scripting	Intermediate	Encryption Technologies	Expert
Continuous Learning	Expert	Analytical Skills	Expert
SIEM Tools	Expert	Problem-solving	Expert
Incident Response	Expert		

| Collaboration | Expert | Penetration Testing | Advanced |
| Threat Detection | Advanced | Firewall Administration | Intermediate |
